

Original Set of Schottische Quadrille

American Dancing Master and Ball-Room Prompter, Elias Howe, 1862

Reconstruction by Susan de Guardiola, September 2008

*Notes: Four bars (4b) = one schottische pattern. All promenades are done with partners side-by-side, his right arm around her waist, her left hand on his shoulder. "Schottische" is done in normal closed ballroom position. Part 1 (P1) of schottische is step-together-step-hop x2; part 2 (P2) is step-hop x4. All moves are done using schottische; no walking. Finish each figure with a final step-close instead of step-hop for stable and graceful ending. Rights and lefts done with hands on both changes. A full discussion of this reconstruction is online at **Capering & Kickery**, <http://www.kickery.com/2008/09/schottische-qua.html>.*
